No. 23

Security Council Discusses UNFICYP Mandate.

ON 16 September, the Security Council resumed discussion of the Cyprus question. The Council had before it a report by the Secretary-General, which recommended the continuation of the Peace-Keeping Operation in Cyprus for another three months.

Mr. Kyprianou, of Cyprus, said his government agreed to the extension of the United Nations Peace-Keeping Operation. He stated that agreement had been reached on the freedom of movement for the Force. He opposed the creation of buffer zones.

Mr. Eralp, of Turkey, favoured the strengthening of the United Nations Force but declared that UNFICYP had been unable to prevent a Greek Cypriot arms build-up. He said that Turkey was agreeable to the proposals regarding the restoration of peace, but defence positions should be maintained until UNFICYP was in position to provide an effective guarantee against attack.

Mr. Bitsios of Greece agreed with the Secretary-General's view that withdrawal of the United Nations Force would be disastrous.

On 17 September, the Council heard Platon Morozov, of the Soviet Union, say that his government would agree to extension of the mandate of UNFICYP only on the express condition that the Council's resolution of 4 March was complied with, particularly as to the financing and the functioning of the Force.

Sir Patrick Dean, of the United Kingdom, said that his delegation would support the renewal of the mandate of the Force. However, the financial burden should be shared by more states.

Adlai E. Stevenson, of the United States, urged all Council members to set an example and contribute to the financing of the Force. He supported extension of the mandate of the Force.

NEW CYPRUS MEDIATOR APPOINTED

THE new United Nations Mediator for Cyprus, Senor Galo Plaza, whose appointment was announced to 16 September, was born in New York in 1906. At the time his father, General Leonidas Plaza, was Minister of Ecuador to the United States.

Galo Plaza was educated in Quito, Ecuador, and attended the Universities of California and Maryland, where he studied agriculture, and Georgetown School of Foreign Service.

In 1936 he was elected Mayor of Quito and in 1938 became Minister of Defence — a position he held for two years.

From 1940 until his appointment in Cyprus, on 11 May 64, as Special Representative of the Secretary-General he had held several official appointments in his own country and in the United Nations. Between times he has returned to private business and was actively engaged in several projects connected with the agricultural development of Ecuador.

Among the official appointments which Senor Plaza has held are Ambassador to the United States 1944-1946, President of Ecuador 1948-1952 (his father had also been President 1902-1906, 1912-1916), Chairman of the United Nations Observation Group in the Lebanon 1958, Chairman of the study group of the United Nations Economic Commission for Latin America (which pre-

Senor Galo Plaza

pared the basis for the Latin American common market) 1959-1960, Chairman of a study group on administration of the Kamina and Kitona Bases in the Congo 1960 and President of Ecuador's Development Bank 1960-1964.

During 1946 Senor Plaza attended the San-Francisco Conference, where the United Nations Charter was written, as a member of his country's delegation.

Senor Plaza who has a thorough knowledge of all aspects of the Cyprus problem has been appointed Mediator in succession to Ambassador Sakari Tuomioja who died on 9 September 1964.

NEWS IN FINNISH

Suomalaispataljoona kunnioitti suurlähettiläs Tuomiojan muistoa järjestämällä Kykkon alueella muistotilaisuuden viime keskiviikkona. Muistopuheen piti maj. Tauno Kuosa. Jäljempänä julkaisemme maj. Kuosan muistopuheen kokonaisuudessaan.

YK:n joukot ovat saapuneet tälle sisäisten riitojen repimälle saarelle pitämään yllä rauhaa, jotta sen pulmat voitaisiin selvittää poliittisilla neuvotteluilla. Pataljoonamme muodostaa huomattavan osan YK:n rauhanjoukoista, joiden harteilla on hyvin suuri vastuu koko maailmanrauhaa uhkaavien Kyproksen pulmien selvittelystä. Tämä on ensimmäinen kerta, kun Suomi osallistuu näin huomattavalla tavalla kansainvälisten kiistakysymysten ratkaisemiseksi. Maamme osuus ei ole kuitenkaan rajoittunut vain sen asevoimien antamaan panokseen. Suomi asetti myös välittäjän, jonka tehtävänä oli saattaa kiistapuolet yhteen hänen hahmottelemaansa sovintoratkaisuehdotusta käsittelemään. Olemme kokoontuneet tänään työhönsä ääreen kaatuneen YK:n Kyproksen-välittäjän, suurlähettiläs Sakari Severi Tuomiojan, muistoa kunnioittamaan.

Saattaa tuntua sattumalta, että välittäjän valinta kohdistui kaikista maailman politiikoista ja valtiomiehistä juuri suurlähettiläs Tuomiojaan. Niillä, jotka hänet tähän tehtävään nimesivät, oli kuitenkin siihen hyvät perusteet. Suurlähettiläs Tuomioja oli nimittäin jo tullut tunnetuksi laajalti maamme rajojen ulkopuolellakin miehenä, joka sekä kykeni suorittamaan että oli jo suorittanutkin mitä vaatimimpia tehtäviä. Jouduttuaan jo poikkeuksellisen nuorena iässä näyt-

The Council is continuing the debate on the Cyprus question.

On 9 September, Finland announced a contribution of 25,000 US dollars to the special account for the financing of the United Nations Force in Cyprus.

THE MEDAL

ON one side of the United Nations medal are the words "In the Service of Peace".

In war time personal medals are given for bravery in the face of the enemy, campaign medals for all those who have taken part. The man behind the scenes is essential to keep the front line men supplied with ammunition, food and other necessities.

In Cyprus the UN soldiers are fulfilling more the task of a police force — restoring order. This is just as difficult a job and requires just as much bravery as in war time.

Which is more difficult? To fight an enemy from a defensive position? Or to be interposed between two warring factions and be caught in their crossfire without means of defence?

It is because men of UNFICYP have been doing this and thereby helping to stop the spread of the conflict into something bigger that the UN has struck a medal. Not to be forgotten are all the officers and men who, though not directly involved in the areas of physical conflict, have been responsible for making the right decisions. They have been concerned with supply, wellbeing and morale, and are responsible for the success of the men at the front.

NECTAR OF THE GODS

Wine tales of Cyprus

TO understand wine, to enjoy it to the full, we must remember Dumas' admonition "Drink it bare headed and kneeling" when speaking for a noble wine, and we must look as deeply into man's heart as into his mind, as Plato must have, when he remarked, so many centuries ago, that nothing more excellent or valuable than wine was ever granted by the Gods to man.

For the history of Cyprus wines the discovery of earthenware jars containing wine tar-tar is of great importance. These jars were discovered in the neighbourhood of Salamis and belong to the 9th century B.C.

The earliest known wine-jar from Cyprus, is the Hubbard Amphora, dated to around 900 B.C. with a remarkable drinking-scene painted on one side, showing a lady seated on a throne, drinking with what appears to be a straw or reed from a painted amphora and a female attendant by her side who pours more wine into the amphora from which the woman on the throne is drinking.

Mediaeval Cyprus has an interesting connection with the great London Guild or Company of the Vintners. In 1363 Henry Picard, Master of the Vintners' Company, and some time Mayor of London, entertained the Lusignan King of Cyprus, King Peter the First, to a banquet in the Vintners' Hall. At this banquet, four other Kings were present, and it later became known as the "Feast of the Five Kings". The most favoured account of the event tells that the four

other Kings were Edward III of England, David, King of Scotland, John, King of France, and Waldemar, King of Denmark. A fine painting of the banquet was presented by the Vintners' Company to the Royal Exchange, and may be seen in the Royal Exchange today. A true copy of this magnificent painting may be seen by any visitor at wine factories in Limassol at Tsiflikoudhia.

Wine has been used as food, tonic and medicine, throughout the world. It has been credited with maintaining health, preventing disease, relieving pain, improving digestion, prolonging life, assisting in the cure of various illnesses, and providing the human body with numerous essential vitamins, acids and minerals. In addition, most authorities agree that wine's function of promoting the fuller enjoyment of life is a definite health value.

"Drink no longer water, but use a little wine for thy stomach's sake and thine often infirmities"

was St. Paul's admonition to Timothy.

Throughout history, from Biblical Times to the present Space Age, wine has been accepted both medicinally and nutritionally, as a boon to mankind.

Twenty-five hundred years ago, Hippocrates was among the first physicians to advocate its use in the healing of the sick. Galen, the Roman physician of the first century A.D. used an ancient Greek remedy, containing parsley, fennel, thyme, anise and other herbs, powdered and mixed with wine, which was pres-

cribed as a cure for most ailments of the time.

It might be said that wine is "all things to all men" for among its many health and life-giving benefits are the following. The alcohol contained in wine provides a source of caloric energy. (Four ounces of table wine equals only about 70 calories — less than an apple or an orange). This type of alcohol, according to current research, is transformed into energy and not into fat. It contains considerable quantities of fruit-sugars — natural sugars — which are highly desirable in the diet. Wine is the only common alcoholic beverage containing proven quantities of the B vitamins, as well as small quantities of vitamin C. Recently it was discovered, in red and white wines, a new vitamin called "P", which is probably related to one of the components of vitamin C.

The wine has a definite blood-building iron content, and furthermore, it contains all of the 13 mineral elements recognized as essential to maintain animal and human life — a moderate amount of wine at meal times will not only build up the blood, but supplies iron to the iron deficient meals of the average citizen.

Drink wine and live longer might very well become a recipe for longevity, for statistics have proven that wine drinkers live longer than water drinkers (and, furthermore, that fewer alcoholics and insane are found in the wine regions).

Wine growing today is a major agricultural industry but it is also an art. Into it, too, must go a magic that is human and intuitive.

SNIPPETS

He: I went hunting lions with a club last week.

She: Weren't you scared with just a club?

He: No, there were 200 in the club.

She: Do you drink liquor?

He: What else can I do with it?

She: What do you wish for in a wife? Beauty or brains?

He: Both.

She: I accept.

COMPLAINTS BY GREECE AND TURKEY

THE Council considered complaints by Greece against Turkey and Turkey against Greece at two meetings held on 11 September.

Dimitri S. Bitsios of Greece stated that Turkey had committed a series of provocative acts, including the expulsion of a large number of Greek citizens.

Orhan Eralp of Turkey asserted that those expelled had been guilty of subversive activities. He declared that Greece was conducting "war-like moves" and was acting in collusion with the government of Cyprus against Turkish Cypriots.

Spyros Kyprianou, Foreign Minister of Cyprus, denied that there was an economic blockade of the Turkish areas in the island. The presence of Turkish ships in the area should be regarded as aggression, he stated.

LETTER FROM USSR

THE Soviet Union has stated that the existing financial difficulties of the United Nations have been caused by the expenses incurred in maintaining the Middle East and Congo Operations.

It declared in a memorandum circulated this week, concerning "the question of the financial situation of the United Nations", that both these actions did not conform with the charter. Consequently expenses connected with them could not give rise to obligations on states with regard to payment.

MALAYSIA

THE Council, in concluding consideration of Malaysia's complaint of aggression by Indonesia on 17 September, after holding meetings on 9, 11, 14, and 15 September, failed to adopt a draft resolution. The question remains before the Council.

At its final meeting, the Council voted 9 in favour and 2 against (Czechoslovakia, USSR) on a proposal by Norway that it call upon the parties to refrain from all threat or use of force and respect each other's territorial independence. The proposal was not adopted, however, because it was opposed by a permanent member of the Council.

The Council, according to Norway, should express regret at the incidents which had occurred in the whole region, and specifically deplore the incident of 2 September which

was the basis of Malaysia's complaint.

Norway also suggested that the governments of Malaysia and Indonesia resume negotiations on the basis of a joint communique issued in Tokyo last June, in which reference was made to a reconciliation commission.

Following is a summary of the statements made after the vote:

Adlai Stevenson of the United States: The majority of members had supported a course of action by which the parties could settle their differences by peaceful means of their own choice. The Soviet exercise of the veto was not designed to engender confidence in its position as outlined in its memorandum on peacekeeping activities, and was not consistent with Mr. Khrushchev's declaration.

Sir Patrick Dean of the United Kingdom: The Soviet "veto" was a denial of protection to a member state and removed an opportunity to end an undeclared war.

Platon D. Morozov of the USSR: The charter allowed all states the right to fight against colonialism and for true freedom. The Indonesian people could not be deprived of its right to fight against neo-colonialism. The USSR vote was not contrary to its declared foreign policy.

Dato Ismail Bin Abdul Rahman of Malaysia: The Council had spoken in a clear voice and had supported his delegation. The draft resolution, even though not passed, had clearly stated the ethical position. Malaysia welcomed the call for negotiations but conciliation had to be two-way. The USSR was the apostle of peaceful co-existence yet it wanted to deny that right to Malaysia.

Sudjarwo Tjondronegoro of Indonesia: A solution rather than a resolution was necessary. His delegation appreciated the fact that the Council had seized on certain detectable areas of agreement, name-

UNITED NATIONS NEWS

ly the Tokyo communique. Nothing was lost if all concerned, including the British, saw the discussions in a positive way.

Dey Ould Sidi Baba of Morocco: Any outside intervention using as a justification the vote cast on the resolution would be contrary to his delegations view.

EVACUATION OF MISSION IN YEMEN

PLANS for the orderly and expeditious evacuation of the personnel of the United Nations Observation Mission in the Yemen and the withdrawal or disposal of its equipment are being carried out, the Secretary-General reported to the Security Council on 11 September. All of the 25 military observers have left the Yemen and all of the 18 civilian staff members will have departed on completion of the disposal of the Mission's equipment in the latter half of September. The total expenses of the Mission during the 14-month period of its operation have not been finally determined, but they are expected to total up to 2 million dollars. Contributions already made by the two governments amount to 800,000 dollars each.

MEMORIAL UNVEILED

THE unveiling of the Marc Chagall stained-glass memorial panel, contributed by the staff in memory of the late Secretary-General Dag Hammarskjöld and those who accompanied him on his mission in Northern Rhodesia, took place on Thursday, 17 September, in the secretariat lobby.

HOW MESSAGES ARE SENT TO UNITED NATIONS HEADQUARTERS

Have you ever wondered how messages are sent back to and received from the United Nations Headquarters in New York?

Because of the distance between New York and Cyprus and the state of the ionosphere it is impractical to maintain communication by short wave radio, although in the infancy of UNFICYP there was a morse link.

To-day there is a very efficient system and it is estimated that messages can be cleared to the UN HQ from 10 to 15 minutes. And this goes via Geneva.

Running the communications centre in UNFICYP are 4 radio officers including the Radio Supervisor.

(Continued on Page 6)

UNIVERSAL DECLARATION OF HUMAN RIGHTS

(Continued)

On December 10, 1948, the General Assembly of the United Nations adopted and proclaimed the Universal Declaration of Human Rights.

Article 26. (1) Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be made generally available and higher education shall be equally accessible to all on the basis of merit.

(2) Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.

(3) Parents have a prior right to choose the kind of education that shall be given to their children.

Article 27. (1) Everyone has the right freely to participate in the cultural life of the community to enjoy the arts and to share in scientific advancement and its benefits.

(2) Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is author.

Article 28. Everyone is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.

Article 29. (1) Everyone has duties to the community in which alone the free and full development of his personality is possible.

(2) In the exercise of his rights and freedoms, everyone shall be subject only to such limitations as are determined by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

(3) These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.

Article 30. Nothing in this Declaration may be interpreted as implying for any State, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.

UNITED KINGDOM

GEOGRAPHY

The United Kingdom is situated off the north-west coast of continental Europe. It comprises England, Wales, Scotland and Northern Ireland and some 5,000 smaller islands. The United Kingdom extends over 94,214 square miles, some 600 miles from north to south, and 300 miles from east to west.

In Britain the higher lands are found in the north and west. Where the rocks are old and hard there are extensive plateau areas of thin infertile soil, such as the highlands of Scotland, the Lake District, the Pennine Chain, the Welsh Mountains, the moorlands of Cornwall and Devon, and the Irish mountains. On the flanks of the Pennine Chain, the slopes of the Welsh mountains, the midland plain of England and the central lowlands of Scotland are newer, though still old, rocks, and here minerals, particularly coal and iron, are found and the manufacturing regions have arisen. Owing to numerous bays and inlets no point in the British Isles is more than 75 miles from tidal water.

The chief rivers are the Severn (220 miles), the Thames (215 miles), the Trent, Yorkshire Ouse and Great Ouse in England and Wales; the Clyde (106 miles), the Tay and the Forth in Scotland. The largest lake is Lough Neagh in Northern Ireland (148 square miles). The highest mountains are Ben Nevis (4,406 feet) in Scotland, in Wales, Snowden (3,560 feet), in England, Scafell (3,210 feet), and in Northern Ireland, Slieve Donard (2,796 feet).

CLIMATE AND VEGETATION

Britain has a temperate and equable climate, with an average temperature of about 40° Fahrenheit (4.4° Centigrade) in January and 60° F (15.6° C) in August. The prevailing winds are south-westerly. The British Isles as a whole have an annual rainfall of over 40 inches, while England alone has about 34 inches; the mountainous areas of the west and north have far more rain than the south and east.

With its mild climate and varied soils, Britain has a diverse pattern of natural vegetation. Woodlands occupy

about 7% of the surface of the country. Most of Britain is agricultural land, of which about one-third is arable, and the rest pasture and meadow. The climate and even distribution of rainfall ensure a long growing season; streams rarely dry up and grassland is green throughout the year.

POPULATION

Some 53½ million people live in Britain. There are about 566 people per square mile, making Britain the fourth most densely populated country in the world. In England and Wales the density of population is 800 per square mile.

Eighty per cent of the people live in towns; over 35 per cent in the seven urban areas whose centres are London, Manchester, Birmingham, Leeds, Liverpool, Newcastle upon Tyne and Glasgow; more than 8 million live in the Capital, London.

GOVERNMENT

The United Kingdom is a monarchical state. It is unitary, not a federal, state but methods of government are flexible. For example there is some measure of devolution in the administration of Welsh, Scottish and Northern Irish affairs.

The monarchy is the most ancient secular institution in the United Kingdom, its continuity being broken only once in over a thousand years.

TRANSPORT

Britain has the largest active merchant fleet in the world, and its 300 ports handle over 150 million tons of goods per year. Its dense network of railways covers some 17,000 miles of route, but the greater proportion of freight traffic now moves by road.

FUEL AND POWER

Coal provides about 70 per cent of Britain's total energy consumption, 273 million tons equivalent in 1962. Nuclear energy is already providing a growing proportion of power requirements. Two nuclear power stations are now supplying power and a further three are due to come into operation this year. Four others are under construction and a tenth has been approved.

THE QUEEN RELIGION

Queen Elizabeth II

Queen Elizabeth II, descendent of the Saxon Egbert, who united all England in the year 829, has a total membership of over 40 million. In addition to its churches in the British Isles it is represented in the Americas, India, Pakistan, Burma, Ceylon, Africa, Australasia, China and Japan. In the Middle East, Jerusalem has the status of an episcopate.

FINANCE

The United Kingdom is the established church of central banker of the world, an area with a quarter of the world's population. Many countries outside sterling area use sterling for their international transactions, and it is the currency in which about one-third of the world's trade is conducted.

INDUSTRY

The United Kingdom is the first country in the world to become highly industrialised. Thirteen people are employed in mining, manufacturing and building for every one in agriculture. It is the world's third largest exporter of manufactured goods, the range of its industrial manufactures reflects its position as one of the most important workshops of the world.

AGRICULTURE

Although Britain is a densely populated, industrial country relying on imports for half its food, its agriculture remains one of its largest and most important industries. It occupies nearly one million people, just under 4 per cent of those in civil employment, and provides about 4 per cent of the gross national product and uses 49 million acres and 60 million acres of land.

The Anglo-Jewish community of some 450,000 is the largest group of Jews in Europe.

There are numerous other religious communities in the United Kingdom. Among them are the Greek, Russian, Polish and Serb Orthodox, the Estonian and Latvian Orthodox and also the Armenian Church. There are also churches belonging to the Lutheran Church of Denmark, Finland and Sweden.

THE ROYAL MINT

The Royal Mint, in London, has a continuous history of operations dating back over 1,100 years. Nearly half of its output of coins is for overseas currencies.

SPORT

The most popular of the team games are football (both Soccer and Rugby) and cricket. The most popular of individual games is lawn tennis.

Other games which have a large following are hockey, golf, athletics and horse-racing. There are also lacrosse, polo, bowls, hunting, sailing, swimming, boxing, wrestling, cycling and motor racing.

HISTORY

Information about the earliest inhabitants of Britain is scanty, but by 450 B.C. the population was predominantly Celtic. In A.D. 43, following an armed reconnaissance by Julius Caesar a century before, the Romans began an invasion which resulted in the Roman occupation of Britain up to a line from Carlisle to Newcastle upon Tyne. The occupation lasted nearly 400 years and many of the sites of towns and outlines of roads built at that time still exist. It was during Roman rule that Christianity first came to Britain although the lasting conversion dates from two centuries after the end of the Roman occupation.

Attacks by barbarian pirates from northern Europe — principally Angles, Saxons and Jutes — followed the withdrawal of Roman forces. The invaders settled on the east and south-east coasts and began to spread across the island, driving back the original Britons into the western part. Gradually the Anglo-Saxons united into kingdoms, and by 800 England was split up into seven kingdoms, with the Britons living in Wales, Cornwall and Cumberland and the Picts in Scotland slowly uniting into a single kingdom. This was a period in which the foundations of English local government were laid.

At the beginning of the ninth century the Danes and Norsemen began to raid England from their Scandinavian ports. Alfred, who was King of Wessex, a kingdom which contained most of England south-west of London, succeeded in stemming the Danish advance, but after his death the Danes met less and less resistance and numbers of them settled in the eastern part of England: Danish kings ruled England between 1017 and 1042.

1017-1042 Ruled by Danish Kings.

1042 English Royal line restored.

1066 Conquest of England by the Normans of France, under William.

1215 Magna Carta signed by King John.

1284 Wales annexed to England.

1346 Battle of Crecy.

1415 Battle of Agincourt.

1485 Wars of the Roses end. Tudor monarchy begins.

1536 Union of England and Wales.

1588 Defeat of Spanish Armada.

1649 Charles I executed. England declared a Republic under Cromwell.

1660 Monarchy restored.

1707 Union of England and

The Prime Minister

Sir Alec Douglas-Home, formerly Lord Home, disclaimed his peerage under the Peerage Act 1963.

Sir Alexander Frederick Douglas-Home is 61. He was educated at Eton College and Christ Church, Oxford University. He played cricket for Middlesex and M.C.C. and enjoys fishing and shooting. He is married and has one son and three daughters.

EXPORTS AND IMPORTS

Britain accounts for about one-tenth of total world trade, taking nearly one-fifth of the world's exports of primary products and providing about 15 per cent of the world's exports of manufactured goods.

Agricultural machinery, textile machinery, machine tools, commercial vehicles, construction plant scientific instruments, electrical machinery, plastics materials and whisky are among the branches of industry whose exports reach a peak value.

STANDARD OF LIVING

Britain has about the seventh highest standard of living in the world today.

In April 1963, the average weekly earnings of an adult male worker in manufacturing were £16 - 12s per week, approaching double the amount recorded ten years previously, with an average working week of just over 46 hours.

In Britain approximately two households in five have a washing machine, nearly one in three a refrigerator, three in four a vacuum cleaner, and four in five a television set. More than one household in three has a car.

Scotland.

1801 Union with Ireland.
1805 Battle of Trafalgar.
1815 Battle of Waterloo.
1914-18 World War I.
1922 26 countries of Ireland leave the United Kingdom.
1939-45 World War II.
1945 Founder member of United Nations. Permanent member of Security Council.

The Houses of Parliament. Famous landmark in the city of Westminster

HISTORY OF CYPRUS

LUSIGNAN (FRANKISH) PERIOD (1192-1489)

UNDER the Lusignans Cyprus enjoyed, in certain aspects, a period of brilliance such as it had never known before. But the great prosperity, which lasted throughout the years of Lusignan rule, brought little benefit to the local people, and the Greek Orthodox Church was fanatically persecuted by the Latin Church, which was now established in the island.

Guy de Lusignan established a feudal system of rule under the barons and knights who accompanied him. The Knights of St. John of Jerusalem (Knights Hospitaller) retained certain parts of the island, on payment to the Crown, later setting up their headquarters at Kolossi Castle (Limassol).

Guy ruled in Cyprus, as a feudal overlord, for only two years when, on his death, he was succeeded by his brother Aimery, who assumed the title of King of Cyprus and, later, of Jerusalem.

The Lusignans rebuilt on a grand scale all the old defences of the middle Byzantine period, including the castles of Kyrenia, St. Hilarion, and Buffavento (Kyrenia) and Kantara (Famagusta) in the north, Limassol in the south, and Paphos in the west.

Nicosia was developed into a strong capital with castle and wall defences and, following the fall of Acre in 291, Famagusta rapidly developed into the richest city in the eastern Mediterranean. Many fine churches, including a cathedral in each of these cities, still exist dating from this period, and especially following the visit of St. Louis of France in 1248. Some of these church buildings are of pure French Gothic design, while others uniquely combine the Gothic and Byzantine styles. The later Lusignans were crowned kings of Cyprus at Nicosia and subsequently of Jerusalem in Famagusta.

Another fine monument, dating from earliest Lusignan times, is the Abbey of Bellapais (Kyrenia).

The peace of the island was temporarily disturbed during the early 13th century when the Holy Roman Emperor Frederick II claimed the regency from John d'Ibelin during the minority of Henry I. For two years the island was plunged into civil war until the emperor's forces were finally

routed (1229) and he was obliged to relinquish his claims.

Cyprus remained at peace for the next 15 years, but then a trivial incident plunged the island into civil war once more. This incident occurred at the coronation of Peter II at Famagusta in 1372 and resulted in widespread massacre among Venetians and Genoese.

The Republic of Genoa directly intervened and sent a large force which captured Nicosia and Famagusta. Kyrenia Castle was strongly assaulted and severely damaged, but held out. Peace terms were agreed in 1374, though with the sacrifice of Famagusta to the Genoese, under whom it remained for virtually the remainder of the Lusignan period.

Three years later Peter II signed a treaty of alliance with Venice and Milan. Further struggles with Genoa in 1402-9 resulted in no change in the status of the island.

Cyprus suffered for the first time at the hands of the Mamelukes of Egypt in the year 1424. Under the pretext that the coastal towns were harbouring pirates who preyed on Egyptian trade, the Sultan Aschraf Barsabei of Egypt sent a force to sack and plunder Limassol. Two years later a similar expedition was made, but this time the Cyprus forces under King Janus did battle near Khirokitia.

The Cyprus forces were routed, King Janus himself being taken prisoner. The Egyptians subsequently marched northwards, captured Nicosia and sacked the city, setting fire to the palace and many other important buildings. King Janus later came to terms with the Egyptians, Cyprus becoming a tributary to the Caliph.

In 1460-4 the reigning Queen Charlotte and King Louis of Savoy were overthrown by the Queen's illegitimate brother James (II) who, with Egyptian aid, recaptured Famagusta. In 1472 James married Caterina Cornaro, a member of one of the most noble Venetian families. Both James and his infant and only son died in suspicious circumstances in 1474.

The Lusignan line being without a successor to the throne gave the opportunity to Venice, now at war with Turkey, to intervene directly and seize the island for the defence of her eastern flank. Caterina Cornaro was forced to abdicate and the island was formally annexed by Venice in 1489.

NEWS IN DANISH

FN-medalje til 972 soldater

Fredag blev medaljedag for soldaterne i DANCON. 972 soldater fik overrakt FN-medaljen som en anerkendelse af den indsats, de har gjort i FN's og dermed fredens tjeneste.

De fleste fik deres smukke medalje i det blaa-hvide baand overrakt af chefen for DANCON, oberstløjtnant H.M.H. Boysen. En særlig styrke, sammensat af soldater fra alle enheder under DANCON, fik dog medaljen overrakt af chefen for UNFICYP, den indiske general Thimayya.

Det skete paa den solstegte og støvede plads foran kantinebygningerne i Elizabeth Camps. Det er at haabe, at de, der fik deres medalje af general Thimayya, har fortalt deres kammerater rundt om i enhederne, hvad generalen sagde. Thi foruden medaljerne faldt der ogsaa rosende ord. General Thimayya sagde, at DANCON har haft det vanskeligste job - opgaverne langs "den grønne linie". Videre nævnte generalen, at de opgaver, de danske FN-soldater har haft paa Cypern, har krævet baade taalmodighed og mod.

General Thimayya vekslede venlige bemærkninger med de fleste af soldaterne, idet han fæstnede medaljen paa deres bryst, og herved blev medaljeoverrækkelsen en særlig oplevelse for mange.

UN MESSAGES

(Continued from Page 3)

From Cyprus to Geneva the message goes over a TOR system (Teletype Over Radio) on a certain frequency. It is typed on a teleprinter machine which converts it into a radio impulse. The impulse is transmitted to Geneva where it is converted back into a message. The TOR system transmits at a rate of 60 words per minute. The equipment used here is the Creed, made in England.

At Geneva the message is transferred to another machine which sends the message the rest of the way to New York along an over-land and sub-marine

IRISH CONTINGENT NEWS

IRISH TROOPS TOUR CYPRUS

Coach tours to cover all areas of Cyprus have been arranged each weekend for troops of the 3rd Irish Infantry Group. This gives the Irish soldier the chance to see and know the history of Cyprus. Starting at 0800 hours and returning at 2000 hours, each trip takes in a different section of the island. A commentary on places visited is given by a courier. These tours provide a welcome relief from routine duties and assist in keeping morale high.

IRISH TROOPS GO UNDER-WATER SWIMMING

The members of the Curragh Sub Aqua Club, Capt H.R. Gallagher, HQ Coy, and Lt S. Gray, 'A' Coy, who are serving with the UN Peace Force in Cyprus find diving in the mediterranean a welcome change from the cold seas around Ireland. Weekly, they go diving with members of the Dhekella Sub Aqua Club and have collected an imposing display of shells, Roman amphorae and sponges. Octupi and Moray eels are now as familiar as were cray fish and lobster off Ireland.

It is of interest to note that the diving programme and daily swimming parade, which is compulsory, helps to maintain the high standard of physical fitness so necessary for troops serving on active service.

cable. This method sends at the rate of 30 words per minute.

The main centre in UNFICYP is at the military headquarters near Nicosia airport. There is, however, a teleprinter system to the political headquarters at Wolseley Barracks. Messages for Wolseley Barracks are sent by teleprinter over a private wire circuit, which is similar to the telephone system.

Traffic between HQ UNFICYP and UN HQ is fairly heavy and on average a total of 300,000 groups are sent and received each month.

THE "ENCLEISTRA" OF ST. NEOPHYTOS

The "Encleistra" of St. Neophytos.

SEVEN miles from the small port of Paphos, at a side prominence of a gorgeous ravine, is situated the Monastery of the Cypriot saint, Neophytos the Recluse.

Saint Neophytos was born in 1134 at Kato Drys, a village near the little town of Lefkara, which has won world fame for its exquisite hand-made lace.

Retiring, at the age of 18, from the vanity of worldly attainments, and following the "straight and peaceful ways of monastic life" he served for seven years as a monk in the then flourishing monastery of St. Chrysostomos, where he received his first education, being formerly illiterate. He then paid a six months visit to Palestine, and, failing to proceed from Paphos to Asia Minor, where he had intended to live as a hermit, he directed his steps towards Melissovoyno, and settled in a cave overhanging the present monastery.

Within a year he had patiently hewn with axe and spade the walls of the cave, and thus made a chapel dedicated to the Holy Cross, and a cell which served as his dwelling place.

At the age of 36, he was ordained priest by the Bishop of Paphos, Basil Kinnamos, and it was then that he founded a monastic community consisting of ten to eighteen monks, and wrote the well-known "Ritual Ordinance", published by Archimandrite Kyprianos in 1179, and by the Rev. Frederick Edward

Warren, B.D., in 1881.

Both the chapel and the cell were in time decorated with notable wallpaintings by Theodoros Apsevis under the personal guidance and supervision of the saint. They are still in a state of good preservation.

When aged 65, Neophytos excavated, at the risk of his life, another retreat higher up the cliff, the "Higher Encleistra, or New Zion", and it was there that he often retired to avoid the annoyance of the ever-increasing number of pilgrims.

St. Neophytos lived in a turbulent period of history. He passed a great part of his life under Byzantine rule, he saw Cyprus ravaged by Prince Isaac Comnenos, he experienced the short occupation of the island by Richard Coeur de Lion, and a longer occupation by the Lusignan Kings. He was greatly depressed by the fall of Jerusalem and Constantinople. He had the sad experience of long droughts, violent earthquakes and eclipses of the sun.

Neophytos the Recluse remains famous not simply for his ascetic life and his unique experience, but even more for his love towards his fellow men, and for his writings. He enjoyed hermitical rest for sixty years, giving himself

NEWS IN FINNISH

From Page 1

telemään johtavaa ossa oman maamme taloudellisessa ja poliittisessa elämässä suurlähettiläs Tuomioja siirtyi vain vajaa kymmenkunta vuotta sitten maamme edustajaksi Lontooseen eli uralle, joka oli johtava hänet kansainväliseen maineeseen. Jouduin täällä ensimmäisen kerran henkilökohtaisesti kosketukseen hänen kanssaan ja opin siellä myös tuntemaan ne hänen ominaisuutensa, jotka olivat tehneet hänestä yhden maamme huomattavimmista miehistä.

Sakari Tuomiojan ulkonaisesta esiintymisestä ei olisi voinut päätellä, että kysymyksessä oli niin omassa maassaan kuin kansainvälisissäkin asioissa kyvin huomattavaa osaa esittänyt henkilö. Hän ei pyrkinyt millään tavoin korostamaan omaa asemaansa tai törkeytään, vaan suhtautui yhtä ystävällisesti ja vaatimattomasti niin yleisimpiin kuin alhaisempiinkin. Vähänkään kokenut arvostelija ei voinut kuitenkaan jäädä epätoiseksi tämän vaatimattoman suomalaisen merkittävyydestä. Ystävällisen hymyn ja hyväntahtoisen ulkoisuuden alle kätkeytyi suuri hallinnollinen ja terävä äly, joka pian paljastui jo yksin hänen ikään kuin ohimennen heitetyissä, mutta naulan kantaan osuissa arvioineissaan. Tuomiojan aikaansaannokset niin hallinto- kuin talousmiehenä ovat selvänä todistuksena hänen poikkeuksellisesta kyvykkyydestään.

Nämä ominaisuudet kohottivat myös suurlähettiläs Tuomiojan korkeimpaan asemaan, jonka kukaan suomalainen on tähän mennessä kansainvälisissä asioissa saavuttanut. Hänen toimintansa YK:n Euroopan talouskomission pääsihteerinä Genevessä oli vielä luonteeltaan etupäässä hallinnollista, vaikka hän joutui jo tässäkin tehtävässään osattamaan neuvotteli-

to prayer, fasting and study of sacred literature, but, nevertheless he remained active to the benefit of his monastery, of the society in which he lived, and of all men in general.

jan ja välittäjän lahjojaan Euroopan eri maiden johtomiesten sekä heidän edustajien kanssa asioidessaan. YK:n edesmennyt pääsihteerin Dag Hammarskjöld lähetti myös Tuomiojan henkilökohtaiseksi edustajakseen Laosiin, joka on osoittautunut yhdeksi nykymailman pahimmista palopesäkkeistä. Tuomioja oli siten ehtinyt saada laajan kokemuksen kansainvälisissä asioissa, kun pääsihteerin U Thant tarjosi hänelle välittäjän tehtävää Kyproksen selkkauksessa. Se seikka, että kumpikin kiistan osapuoli hyväksyi epäröimättä hänen ehdokkuutensa, on selvä todistus suurlähettiläs Tuomiojan nauttimasta arvonnasta.

Tuomioja oli ehtinyt jo varsin pitkälle tässä välitystoiminnassaan, kun sen vaatimat ponnistukset mursivat hänen voimansa. Hänen onnistumismahdollisuuksiaan on vaikea arvioida. Me täällä Kyproksella toimivat tiedämme omasta kokemuksestamme, mitenkä syvät epäluulot ja jopa suoranainen vihakin erottavat kiistan osapuolet toisistaan. Mutta jos tämä tehtävän suorittaminen on inhimillisesti arvioiden kenellekään mahdollista. Sakari Tuomiojalla olisi luultavasti ollut siihen parhaat edellytykset. Hänen odottamattoman poismenonsa johdosta Kyproksen eri väestöryhmien edustajien taholta esitetyistä lausunnoista ilmenee, että täällä vihan. epäluulojen ja pelon raastamalla saarellakin oli opittu tuntemaan hänen vilpittömyytensä, hyvä tahtonsa ja lahjomaton tasapuolisuutensa. Tämä olisi antanut edes jonkinlaisia taakkeita siitä, että äärimmäisen mutkikkaaksi osoittautunut Kyproksen selkkaus olisi ehkä voitu selvittää välitysratkaisun avulla.

Pienellä maalla ei ole koskaan liikaa huomattavia miehiä. Sakari Tuomiojan ennen aikainen poismeno on siten hyvin raskas menetys maallemme. Tämä menetys ei kuitenkaan rajoitu vain Suomen kohdalle. Myös Kypros ja jopa koko maailmakin on kärsinyt raskaan menetyksen. Kärsivällisiä, kiihottomia, maltillisia ja viisaita rauhanrakentajia ei ole suinkaan liikaa ihmiskunnassa, joka antaa lyhytnäköisen oman edun tavoittelun ja sokean kiihkon saatavaa varaansa sille nykyisin tarjoutuvat loistavat mahdollisuudet. Sakari Tuomiojan tapaisilla miehillä on vielä aivan liian paljon tehtävää kansainvälisten pulmien selvittelyssä, joiden onnellisesta ratkaisemisesta saattaa monessa tapauksessa riippua jopa koko ihmiskunnan tulevaisuus. Yhdenkin tällaisen miehen menettäminen on siksi korvaamaton tappio.

THE FOOTBALL TEAM OF 'B' COMPANY, 40th IRISH BATTALION

THE football team of "B" Company, 40th Irish Battalion, are rightly pleased with their prowess while they have been serving in Cyprus. The team is so far undefeated. In games played outside the battalion their record reads played 5, won 5. They are also in the final of the Battalion League.

In the picture shown above the team from left to right is:—

Front Row: Lt. M. O'Donnell, S/s Malone, S/s Sheehan, Sgt Shaw, S/s Gardiner, S/s O'Sullivan.

Back Row: S/s Hayes, S/s Tier, S/s Laste, S/s O'Flynn, S/s Cannon, Sgt McDonald, Trainer.

CROSSWORD

CLUES ACROSS

1. As a March Hare may be.
4. Stuffing? Not for the chicken.
6. For scenic effect a third of an egg is needed to discover this art.
9. Not the yawning kind.
10. Second rate butterfly.
13. Red in the sunlight.
14. Just not knowing.
16. GREAT! The Royal Artillery have been taken away.
18. Looks into.
19. A kind of search. I'm in the dark!

CLUES DOWN

1. Chalky.
2. One who does this is usually viewed in clinical suspense.
3. Mayday.
4. PBI. Light but royal.
5. Half filled with ink, but on the whole useless when pointless.
7. Has the farmer come one?
8. GO at this stone.
11. Two is to four as greater is to this.
12. Be wary is entangled.
15. No chicken. He will need urging.
17. Two-thirds of a tot either way.

The results of the Finnish games of the championships are as follows.

Jalkapallo:

		points
1.	5.JK	15—4 10
2.	3.JK	14—4 8
3.	4.JK	12—10 4
4.	2.JK	8—10 4
5.	1.JK	8—19 2
6.	EK	6—16 2

Pes pallo:

		points
1.	3.JK	8
2.	EK	6
	1.JK	6
	5.JK	6
5.	2.JK	2
	HK	2

Lentopallo:

		points
1.	3.JK	12
2.	5.JK	10
3.	4.JK	8
4.	HK	6
5.	EK	4
6.	1.JK	0
	2.JK	0
